Commentary on Ying et al., p. 158

New Routes to Old Places: PIK3R1 and PIK3R2 Join PIK3CA and PTEN as Endometrial Cancer Genes...............................106
S. Herrero-Gonzalez and A. Di Cristofano
Commentary on Cheung et al., p. 170

RESEARCH BRIEF

C-Raf Is Required for the Initiation of Lung Cancer by K-Ras\textsuperscript{G12D}.............128
F. A. Karreth, K. K. Frese, G. M. DeNicola, M. Baccarini, and D. A. Tuveson
Précis: C-Raf, but not B-Raf, is required for K-Ras\textsuperscript{G12D}-induced tumorigenesis and should be considered an important therapeutic target.

Kras, Pten, NF-κB, and Inflammation: Dangerous Liaisons

Précis: Next-generation sequencing is used to temporally order the occurrence of genetic aberrations in epithelial cancer.
Ovarian Cancer Spheroids Use Myosin-Generated Force to Clear the Mesothelium

M. P. Iwanicki, R. A. Davidowitz, M. R. Ng, A. Besser, T. Muranen, M. Merritt, G. Danuser, T. Ince, and J. S. Brugge

Précis: Time-lapse video microscopy shows that ovarian cancer spheroids clear the mesothelium via myosin-generated force.

PTEN Is a Major Tumor Suppressor in Pancreatic Ductal Adenocarcinoma and Regulates an NF-κB-Cytokine Network

Précis: PTEN is shown to be a tumor suppressor in human PDAC and controls NF-κB-dependent transcription via PI3K-AKT signaling.

ON THE COVER

Cheung and colleagues report aberrations in the PI3K pathway occur in a majority of endometrioid endometrial cancers, with coordinate mutations of multiple pathway members being more common than predicted by chance. Multiple gain-of-function PIK3R1 and PIK3R2 mutations result in the stabilization of PTEN protein with likely contribution from the ubiquitin-proteasome degradative pathway, as depicted by the cover. For details, please see the article by Cheung and colleagues on page 158.
