REVIEW The Emergence of lncRNAs in Cancer Biology 391

J.R. Prensner and A.M. Chinnaiyan

RESEARCH ARTICLES Prevention of Persistent Human Papillomavirus Infection by an HPV16/18 Vaccine: A Community-Based Randomized Clinical Trial in Guanacaste, Costa Rica 408

R. Herrero, S. Wacholder, A.C. Rodríguez, D. Solomon, P. González, A.R. Kreimer, C. Porras, J. Schussler, S. Jiménez, M.E. Sherman, W. Quint, J.T. Schiller, D.R. Lowy, M. Schiffman, and A. Hildesheim for the Costa Rica Vaccine Trial Group

Précis: Cervical cancer prevention efforts in developing countries should focus on vaccination of young women prior to sexual activity.

Variants in Inflammation Genes Are Implicated in Risk of Lung Cancer in Never Smokers Exposed to Second-hand Smoke 420

M.R. Spitz, I.P. Gorlov, C.I. Amos, Q. Dong, W. Chen, C.J. Etzel, O.Y. Gorlova, D.W. Chang, X. Pu, D. Zhang, L. Wang, J.M. Cunningham, P. Yang, and X. Wu

Précis: A variant of the TGF- β receptor ACVR1B increases risk of NSCLC in never smokers exposed to environmental tobacco smoke.

TGF- β Receptor II Loss Promotes Mammary Carcinoma Progression by Th17-Dependent Mechanisms 430

S.V. Novitskiy, M.W. Pickup, A.E. Gorska, P. Owens, A. Chytil, M. Aakre, H. Wu, Y. Shyr, and H.L. Moses

Précis: IL-17 contributes to immune evasion in TGF- β receptor II-deficient tumors and represents a novel therapeutic target.

An LXR Agonist Promotes Glioblastoma Cell Death through Inhibition of an EGFR/AKT/SREBP-1/LDLR-Dependent Pathway 442

D. Guo, F. Reinitz, M. Youssef, C. Hong, D. Nathanson, D. Akhavan, D. Kuga, A.N. Amzajerdi, H. Soto, S. Zhu, I. Babic, K. Tanaka, J. Dang, A. Iwanami, B. Gini, J. DeJesus, D.D. Lisiero, T.T. Huang, R.M. Prins, P.Y. Wen, H.I. Robins, M.D. Prados, L.M. DeAngelis, I.K. Mellinghoff, M.P. Mehta, C.D. James, A. Chakravarti, T.F. Cloughesy, P. Tontonoz, and P.S. Mischel

Précis: Inhibition of cholesterol metabolism is a novel therapeutic strategy for EGFR-mutant glioblastomas.

ON THE COVER

Herrero and colleagues demonstrate that Cervarix, a bivalent AS04-adjuvanted HPV16/18 vaccine, is over 90% effective in preventing persistent infection in HPV-negative women among a large Costa Rican population with a high incidence of cervical cancer, but its efficacy diminishes with age and sexual experience. One of the first public HPV vaccine trials, this study underscores the importance of early HPV vaccination in cervical cancer prevention, particularly in developing countries. For details, please see the article by Herrero and colleagues on page 408.
