Supplementary Figure Legend

Supplementary Figure S1: Pharmacokinetic profile of Sym004. Panel A: Sym004 concentration-time curves after the first infusion (log scale) in the dose-escalation cohort. Panel B: Geometric mean $\text{AUC}_{(0-168\text{h})}$ for Sym004 after the first infusion in the dose-escalation cohort. Panel C: Mean Sym004 concentration time curves (trough values, linear scale) in the dose-expansion cohorts. Only individual patient samples during uninterrupted Sym004 treatment contributed to the analysis.
